

FRIDAY, JUNE 6, 1873.

**POCKETS PICKED.**—Mrs. Samuel Curtis and Mrs. David Badger of Weymouth, had their pockets picked in Boston last Saturday, the former losing \$18 and the latter \$150. It is stated that two persons were upon a number of others persons the same day. Ladies who visit the city for shopping purposes should be constantly on their guard against these pilferers.

**DRAMATIC.**—The entertainment given in Lincoln Hall, by the Amateur Dramatic Corps, for the benefit of Mr. R. W. Walker, one of their number, was largely attended, and about \$40 was realized after paying expenses. The corps was assisted by Mr. Luby, of the Sherman Amateur Company, of East Arlington, a rising star in the Dramatic firmament.

**FIRE ALARM.**—The house of Mr. James Ward at Weymouth Landing, was discovered to be on fire about 3 o'clock last Wednesday morning, and an alarm being given, some of the neighbors hastened to the spot, and with their help the fire was extinguished before much damage had ensued. The fire is supposed to have been caused by a defective chimney.

**DIVORCE CASES** were numerous at the session of the Supreme Judicial Court, at Dedham last Saturday, no less than 21 cases coming up for adjustment, these sunderings of the matrimonial tie comprising about all the business before the Court.

**SALE OF REAL ESTATE.**—The estate of Wm. R. Emerson, Esq., on the Monatiquot River, in East Braintree, has been purchased by Mr. Gilbert Nash, for \$500. The estate comprises one and a half acres, with buildings on the same.

**OFF WEST.**—Messrs. Austin, Tirrell and S. C. Dyer, of East Weymouth, who have been travelling in Wisconsin and Minnesota, for the purpose of recruiting their health, have forwarded Western papers, for which they have our thanks. They visited Rev. G. Cole, at Red Wing, a few weeks since.

**SEWING MACHINES.**—The firm of Leavitt & Brant, No. 50 Bromfield street, Boston, is well known to many of our readers as a reliable house for sewing machines, their furnishings and as dealers of articles which are unequalled. Their advertisement in another column gives full particulars of their business, and those in want of anything in their line will do well to give them a call.

**THE 230TH ANNIVERSARY** of the Ancient and Honorable Artillery Co., of Boston, occurred last Monday, exercises being held in the Harvard street church. The musicians of the service, under the direction of Mr. Dow, the choir being composed of twelve gentlemen, among them Mr. C. H. Webb, of Weymouth, and their artistic rendering of the vocal selections added much to the interest of the service. We are indebted to Mr. Dow for favors connected with the celebration.

**ODD FELLOWS' CELEBRATION.**—We learn from Capt. Wm. H. Sargent's Crescent Lodge, I. O. O. F., that the arrangements for the celebration at North Braintree, the 17th inst., will be of a most imposing character.—15 Lodges and 3 Encampments, having reported their intention to be present, also the Grand Encampment and Grand Lodge officers and delegates. Carriages are to be provided for the ladies, who are invited to walk in the procession and the services of Mr. Field, of Taunton, have been secured for the banquet, which will be the first. It is expected to be one of the largest turnouts which has ever occurred in the country.

**FUNERAL OBITUARIES.**—Union Lodge of Good Templars of Weymouth Landing paraded last Sabbath, and participated in the funeral services over the remains of Miss Eliza F. Crocker, an esteemed member of the Lodge, who died on Thursday, the 29th, after a lingering illness of consumption. Services were held in the Universalist church, Rev. Mr. Davis and Mrs. Folson officiating, and the remains to the Village Cemetery, where the impressive funeral service of the Order was rendered.

**RESIGNED.**—Rev. Mr. Lloyd, rector of Trinity Episcopal Parish, Weymouth, has resigned his charge, in consequence of ill health. He has removed to Oxford, near Worcester, where he will escape the sea air, which aggravated the bronchial difficulties under which he labored. Mr. Lloyd has passed much time in the "Promised Land," in right places, in his labors in this Parish, and it is with regret that we chronicle his departure.

**A CAMP.**—The Comrades of Post 53 take this method to express their obligations to the ladies of the Second Universalist Society of Weymouth, for their efforts in preparing the bountiful repast for our Comrades and guests at Union Hall, on Friday evening.

Our ladies, so overflowing with gratitude to those ladies kindly volunteered to take charge of the entertainment, and whose efforts crowned it with a brilliant success, and to the families which supplied so abundantly solid food and delicacies for the table, which contributed so largely to our happiness.

Those who helped us in our Memorial Services our heartfelt thanks are hereby tendered.

The memory of these delicate attentions will long remain in the hearts of the comrades who were the recipients of such kindness.

In behalf of the Comrades of Post 53,

JAMES L. BATES, Com.

**SMASH-UP.**—A gentleman named Bradford, a tramp, had his bicycle smashed on Front street, Weymouth Landing, last Wednesday evening, the horse having backed out of the yard of Mr. L. Loud, in the absence of the driver, and striking a post the animal became frightened and dashed down the street, toward the Square, where he was caught, after having wrecked the vehicle to which he was attached.

**LETTERS RECEIVED.**—Remaining in the Weymouth Post Office, May 28, 1873.

Mr. Benj. Bowker, John Beards, Capt. I. Cushing, William Callahan, Samuel C. Davis, Miss A. Drury, Mr. G. D. Farnsworth, Mr. George J. Fox, Mr. J. S. Hardinge, Mr. N. Hopkins, Miss M. K. Kelley, William Littlefield, Miss Eliza F. Crocker, Philip Megg, Martin Gilman Mulligan, Mrs. Maria Mulligan, Mrs. Maria Mulligan, Ryan, Lawrence, Ryam, Howard Bourne, Miss E. Squires, C. S. Spurrer, Edw. W. Sergeant, Miss D. Thompson, Geo. Thompson, Mr. Thompson, Mr. Thompson, George Young.

**CONSTABULARY REPORT FOR MAY, 1873.**

Liquor Proscriptions, 709; General Offences, 346; Liquor Seizures, 393; Gaming, " Amount of Fines paid, \$12,533.2; " Costs, 510.42; Total, \$17,043.54; Expenses of the Department for month of May, \$11,421.88.

**SODA.**—Mr. F. Ambler, at Weymouth Landing, has a nice assortment of syrups and furnishes the best and coldest soda "this side of Boston." Try it.

### Memorial Day

Has won an established place in the later list of American holidays. It is but few years since the idea of making this day set apart as a sacred day in memory of the brave men who lost their lives in the war of the rebellion was first advanced by Mr. Reipath in Charleston, S. C. Each succeeding year preparations for the day have been made that it would be patriotic to the party if it did not provide at least a portion of the public schools and providing for an occasion to eulogize the glories of the fallen brave, every borough in the Commonwealth has done what it could to keep green the memory of the patriot dead.

Another cause of the popularity of the day is the war of the rebellion was partly due to the fact that the people have seen the apparent success of the cause, every village that is not a holiday at a memorial day that is kept has been a day to honor the hero.

The most elaborate order of exercises, however well devised, the most eloquent of orations, however persuasively worded, would fall dead on the ears of a community that were not proud of their country, and grateful to the men who saved it from dispersion.

The fat skies and cool air of the third of May made the occasion one of the most enjoyable of these memorial days, and called out a large number of spectators in the different villages of our town to greet the soldiers on their arrival. At Weymouth Landing the line was formed promptly at the appointed hour, and the column moved down Washington street to the Square, where the carriages were in readiness to convey the soldiers to East Weymouth.

The band of the First Massachusetts, under command of Gen'l Bates, the German Band, consisting of the sweetest strains of martial music. The graves were decorated, and the column moved down Washington street to the Square, where the carriages were in readiness to convey the soldiers to East Weymouth.

**Weekly Gazette and Reporter**  
FRIDAY, JUNE 13, 1873.

**PRESIDENTIAL.—**On Wednesday evening, June 4th, at a meeting of the Ladies Social Union, connected with the Congregational Church, East Weymouth, Mr. F. P. Parker, one of the young men of the society, presented the pastor, Rev. E. P. McElroy, with a reclining chair, in the following address:

Dear Sir:—The Young Men in this Society have seen fit to select me to present a part of this evening's entertainment, which gives me great pleasure. It is simple to say, that we are not the men of the lively interest which you have ever manifested in our behalf, and to express our true feelings we present you this Reclining Chair, and when inclined to recline, may you do so with our best wishes.

To this Mr. McElroy appropriately responded:

**ACCIDENTS ON THE RAILROAD.—**Perry Cran, of East Weymouth, was struck by a passing train, Monday night, while walking on the track between South and North Braintree. He was, we have been informed, in an intoxicated state at the time, and the accident was his own fault.

A brakeman named Parker was killed on the South Shore Railroad this week, by contact with a bridge.

**BUILDING MOVED.—**The building recently occupied by J. W. H. & Co., a grocery store at Weymouth Landing, has been purchased by Mr. Samuel Pray, for ganz accommodation, and has been removed to the lot on Washington street, south of the Village Cemetery.

**HOTEL ACCOMMODATION.—**Col. Cleary is endeavoring to fill the vacuum created by the closing of the hotel at Weymouth Landing, by furnishing substantial meals to transient customers, and accommodations for lodgers, to the extent of his means. See advertisement.

**APPOINTMENT.—**Mr. J. Murray Whitcomb, who has for several years occupied the position of station agent of O. C. R. R., at South Weymouth, has resigned the situation, and the State Police Commissioners have tendered him an appointment on the State Police force, which he has accepted, and commenced his new duties this week. He will be stationed at the head quarters of the force, in Boston, for the present.

**MOVING.—**The building owned by Mr. George W. Trelle, at East Weymouth, and occupied by him for photographing, has been moved to a new location on Broad street, near H. L. Dow's store.

**CARRIAGES, &c.—**The advertisement of Mrs. Badger, in our columns, furnishes an excellent opportunity for persons in want of carriages, or harness, which will be sold by her on favorable terms.

**THE CONCRETE** which is advertised by Mr. S. W. Gutterton, has been applied to the basement bottom of the new house now being built on the corner of Main Street and Weymouth, by W. T. Butrell, for a paint shop. The material is considered to be superior to cement for this purpose, and will no doubt come into general use.

**THE DRY WEATHER** which prevails throughout this part of the country is seriously damaging the crop of grass, and bids fair to bring strawberries to a high figure in the market.

**THE SHOE BUSINESS** is at the extreme point of stagnation at the present time, and the number of workmen who are idle, is large. It is hoped that there will be a change in a few weeks, for the benefit of all concerned.

IT is proposed to have a series of open air religious meetings in East Abington this season. A place has been selected near Dillons, on Webster street. The first series will be held Sabbath afternoon, June 15th.

**ORNAMENTAL.—**The crop of catarpilars this season is unusually large, and some of our people are taking especial pains to increase the number of these pests by allowing them the largest liberty in roaming from their trees to those of their neighbors. A few hours' work would clear an acre of these despoilers of the leaves, but from present appearances we should judge that some of our citizens look upon them as ornamental appendages to the foliage.

**SUNDAY SERVICES.—**The usual routine of Sabbath observances has been summarily changed by some of the tails of Weymouth Landing. Last Sabbath the precincts of Washington Square were invaded by a party of ball-players, whose running and batting practice was at full swing, although at the time church service began in the afternoon. There were no special pleader for Sunday amusements, we hope, in common with the residents in and around the Square, that the Constatles will do their duty, and arrest all persons engaged in such violation of the statute.

**DEATH OF A PROMINENT BUILDER.—**Mr. Isaiah Warren Thayer, well known as a builder in the town, died Saturday morning. His Saturday services had been held at his house, and becoming much heated he went into the cellar to work in a cooler place, when he was suddenly seized with paralysis from which he never rallied. Mr. Thayer's age was 55 years and 3 months. He was a native of Weymouth, his birthplace, and the estate he owned here was held in the Congregational Church. On Monday afternoon last, and the remains were interred in the Mount Wollaston Cemetery.

**THE DESCENDANTS** of Moses Orcutt, of South Weymouth, have a family gathering at the Fair Grounds, the 26th, particulars of which are given in our advertisements.

**INCENDIARY.—**An attempt was made on Tuesday night to set fire to the High School building in East Abington. A fire had been started on the floor of the lassment, and but for its timely discovery must soon have communicated to a pile of wood and thatch to the building itself. Two boys discovered it and gave the alarm to a resident, near by, who promptly put it out.

**MASONIC.—**At the session of the Grand Lodge of Massachusetts, held in Boston, on Friday evening, the proposed new Constitution was proceeded with. Among the amendments adopted was one providing that the warrant of a lodge can be surrendered only when there cannot be found among its members seven qualified brethren desirous of retaining the same; and affiliated Masons shall not be allowed to visit any lodges, except their own.

It is provided that no member shall be permitted to sever his connection from the Lodge of which he is a member, until he shall present a ticket from some warranted Lodge that he has petitioned for member ship therein.

**Agricultural Meeting.**—A meeting of the Directors of the Weymouth and Industrial Society was held at the meeting-room of Messrs. Fogg, Houghton & Codidge, So. Weymouth, Tuesday evening, June 10th, at which the following action was taken:

Yester evening during the afternoon and evening, and Alvin Raymond, Jr., Chas. Merritt, Jas. H. Clapp, Wm. H. Sargent, and Leonard B. Trelle, were chosen as a committee to arrange a programme of exercises, which will be held at the schoolroom in the following address:

The Directors propose to have first in the evening, the money for which shall be raised by sale of tickets. The tickets will be sold at 25 cents apiece, which, about the grounds, and to the hall and seats. Persons subscribing will receive the equivalent of their subscription in tickets. All proceeds will be turned over to the Society, for the benefit of the poor, the aged, and the sick.

**NOTICE TO SUBSCRIBERS.**

**Postal Requirements.**  
On the first of July next, the free transmission of newspapers through the mail—a privilege which has long been enjoyed by subscribers in the country where the paper which receives their patronage is published, will cease, and all who receive such papers will be required to pay postage on the same. The new regulation has been the subject of considerable comment by the press, some of the editors deeming it unjust, and asking their brethren of the press to protest against it; while others—who believe that the small addition of 20 cents a year, no subscriber will stop their favorite paper—think that the result will be that the "little million" of papers which have sprung into existence like toadstools in the night, will come to an untimely end, and those which are really worth anything will thrive better.

The new regulation furnishes an opportunity for the introduction of another novelty, advanced by the New York Sun, which is the total abolition of the exchange systems—that paper stating that "the Sun will cease to be sent in exchange to any other paper, and will not receive exchanges." For all papers in different parts of the country that we require we propose to subscribe and pay, just like any other subscriber; and all our friends who desire to have the Sun can procure it upon the same conditions. Our contemporaries will understand that this is not because we fail to appreciate their merits or desire to interrupt the friendly relations which have so long subsisted between us and most of the press; it is merely the introduction of a new business arrangement which we are inclined to regard as more simple, convenient and than the old one."

**VALUABLE HORSE.**—A magnificent stallion, costing \$4000, was exhibited in our streets, last week, attracting general attention. The animal belongs to a gentleman in North Weymouth.

A resident of Weymouth, some months since purchased a horse of Mr. Wilkins, the noted dealer in Braintree, for \$200. The animal, paying him \$200 for the animal, but finding it to be of a more spirited kind than he desired, a swap was made, and the horse returned to Mr. Wilkins' stable. The next purchaser developed the animal's speed sufficiently to sell him for \$600, and at the last sale of the horse, we learn that he brought \$1000.

**MISSIONARY WORK.**—Rev. D. W. Waldron occupied the pulpit of the First Church, in Braintree, last Sabbath, and in the afternoon gave an account of his missionary work among the poor and degraded residents of the city.

**NEW TEAMS.**—It is said that 300 new teams have been added to the horse resources of Weymouth this season, many persons who have never before aspired to horse ownership having invested in this line.

**GOOD LIKENESSES.**—G. W. Tirrell, photographer at East Weymouth, has recently finished a group of pictures of the East Weymouth and Quincy, Oreg., of which are several likenesses of the originals, and twice as handsome. Cox says the artist has made "look as white as the whitest of the corps."

**DRUGGIST.**—Nahum Perkins, Esq., of North Bridgewater, who died in that town the 5th inst., was a brother of Rev. Jonas Perkins, of Braintree, the latter now being the only surviving member of the family. Mr. Perkins was a Representative in the Legislature of 1853, and was for many years a Selectman of the town. His age was 80 years 9 months and 10 days.

**SPORTING.**—Dr. Fay, of East Weymouth, left town last week for a time, seeking, in hunting and other sports, the recovery of his health, which has become much impaired by constant attention to medical duties.

**ARREST OF SIDEWALK COMMITTEE.**—Two young men were transferred from the sidewalk on Washington Square, Weymouth Landing, to the lock-up, last Thursday evening, by State officer Edmunds, who, in the opinion of the committee, and the court, the former bargainers, had made it his especial business to "tear up the track," and put an end to sidewalk deliberations. The officer politely requested the young men to "move on," or rather off, but his request not being heeded, they were marched up to the lock-up, and next morning appeared in the District Court at Quincy, where the case was continued, a copy of the By-Law relating to the "old structure" not being obtainable at that time.

**FATAL ACCIDENT.**—Last Friday afternoon William Kelley, a boy of 14 years, son of John Kelley, who resides on Common street, Weymouth Landing, was riding through Front street, on a wood team belonging to Mr. T. B. Porter, and when near the Village Cemetery he was thrown from the wagon by the seat breaking, and fell on his head, striking his skull against his breast and stomach, breaking the ribs and inflicting other injuries. He was taken up by some of the neighbors nearby, and carried to the home of his afflited parents, where Dr. Thimkin attended him, but the boy survived only a few minutes after the Doctor reached the house.

**Moving of BUILDINGS.**—Mr. J. D. Blanchard, of South Weymouth, has moved his residence to the rear of his present house. The central marker in which his work is done is seen in the removal of the factory building of J. W. Hart & Co., not even a light of glass broken. We are now engaged in removing the old tannery buildings of Mr. Thomas Humphrey, at East Weymouth, their new location being on the far south of Lovell's ice house, where they will be converted into dwellings.

**ANNIVERSARY.**—The anniversary of the opening of Mrs. Dr. Tuck's Hygienic Retreat, at South Weymouth, occurs Friday evening of next week, when there will be a brilliant gathering of the citizens of the town and guests from abroad. *Guests and Friends*, with friends and a general good time may be anticipated. Dr. Tuck has effected a number of cures of chronic complaints among his patients, and she deserves the commendation of the public in her "strong minded" efforts to alleviate the woes of humanity.

**Semi-Centennial.**—Fifty years having passed since the introduction of Methodism into East Weymouth, the Church in charge of the same will celebrate its Semi-Centennial on Wednesday, June 28, with a Solemn Feast at 6 o'clock; a Service by Bishop Wiley at 2 o'clock; and a reunion of former Pastors and Members in the evening. The occasion was one of much interest, and we hope to present in our next report of the anniversary.

**Cerebral Spinal Meningitis.**

The prevalence of this fatal disease in this village, and number of deaths having recently occurred in Weymouth, Boston, Hingham and Abington, leads us to publish an outline of its causes and the measures required to prevent its visitations. In other words, are weak or diseased, and is frequently induced by scurvy, measles, and other diseases caused by a blood-poison. Among adults the most frequent causes are intercurrent fever, overwork, bad drainage, sunstroke and other actions of the body, and material poisons. In a word, as one of the earliest symptoms of the disease is nervous excitement, due to inflammation, anything which tends to produce nervous action, mental overexcitement, and the use of alcohol, stimulants producing in the patient the very conditions under which it works most readily and fatally.

There is another marked cause of the disease in bad drainage and tidal excursions. Whether the simple and well known laws of health are in this respect not needed, and bad are inefficient drainage, and material poisons from decaying organic matter, should be considered. The extreme prevalence of this disease, however, habits, entire abstinence from intoxicating beverages, an iron-toned mind, and cleanly surroundings, will do much to reduce the mortality, and cerebral spinal meningitis, under these conditions, will be less a terror than it is.

**OBITUARY.**—At the regular meeting of Union Lodge, No. 1, O. G. T., held on Friday evening, June 13th, the following resolutions were adopted on the loss by death of their beloved Sister, Ella F. Crocker:

Whereas it pleased God, in his all wise Providence, to remove by the hand of death our beloved Sister, Ella F. Crocker, and whereas, we the members of Union Lodge have lost a highly esteemed and much beloved Sister from our circle.

Resolved: That we shall ever cherish the kind remembrance of the virtues of our dear beloved Sister, and that her example of them soaring man, to whom extensive travel has imparted more than ordinary culture. The moral and religious principles which pervade Martha's Vineyard are peculiar in their attractiveness and their strength. Thirty-nine years ago a camp meeting was established, at which services were held for the benefit of the poor, and the service was from a subscriber abroad, who endures the Gazette as a paper giving great satisfaction to those who formerly lived in town, and classing it among the best of local papers; a compliment at which we appreciate, and it comes from one who is qualified to judge.

Resolved: That we deeply sympathise with the afflicted mother and family in their sad bereavement.

Resolved: That a copy of these resolutions be sent to the Family of the deceased, and that they be published in the Weymouth Gazette and Temperance Al-

bun.

**EMELINE H. MONTGOMERY,**  
H. N. T.,  
O. T. BASSETT,  
C. W. STEVENS.  
ANN T. EWELL  
Committee.

A. CARE.—Mr. and Mrs. Louis F. Gomez, desire to express their obligations to the kind friends who so abundantly supplied them with all needs, to their comfort, after the fire in this town, on the night of May 30th. The memory of such kindness will long remain in our hearts. Our thanks to all, especially to the Mutual Aid Society of this town, to the Fire Department, and to the Committee.

Resolved: That a copy of these resolu-

tions be sent to the Family of the deceased, and that they be published in the Weymouth Gazette and Temperance Al-

bun.

## Farm, Garden and Household.

### Farm Notes.

The largest farm in Illinois runs its owner in debt over \$100,000. A few years ago the first premium for the best farm in Illinois was given to one of 40 acres, located near Bloomington.

A correspondent of *The Mark-Lane Express* is authority enough to assert that it is impossible of paraffine is applied into quiet of peas just previous to planting, so that they are coated, no vermin will touch the seed. The suggestion is worthy of notice, as it is not unreasonable to suppose that seed-corn thus treated might, in a measure, be protected from the ravages of cut-worms.

Although the rotation of crops has been an established principle in agriculture for 20 centuries, yet it is not 50 years since attention was first called by Dureau de la Malle to the natural rotation of vegetable growths. This author witnessed in the observations on 30 years five or six such natural alternations of grasses and leguminous plants in the pastures lands of the district in which he resided.

Perhaps as good a way as any of exterminating a nest of ants is to dig the nest open and flood it with a kettle of boiling water. If a bushel of quicklime is then thrown in and the earth replaced the colony will be broken up, and the few ants left will seek other quarters. If there is any simpler method, probably some of our readers may be able to advise.

The London market gardeners pay \$200 per acre yearly rent for the land they cultivate, and their average profit amounts to \$500 per acre. One English penny (equal to two of our cents) per square yard is equal to \$100 an acre, and as there are nine fine lawns, raised to a uniform square, in these gardens, it is not at all improbable that a few cents of our market gardeners "go seven better" than this, but these gardeners are few.

The Danish farmers make butter that may be safely shipped from Copenhagen to China and back again. Their butter, originally good, is sealed up in tins, cans, in which condition it undergoes no change. It is sold in Denmark for 4 to 28 pounds, and a large business is done between the merchants of Copenhagen, London, and Liverpool, and those of China, Brazil, Java, Spain, and other countries. Hero is a hint for our butter factories.

A correspondent of the *London Times* writing on the potato disease, which measurably destroyed last year's crop in England, found the disease was not so bad as to be done to prevent it. (1) A proper selection of seed; (2) drying the seed in the sunlight and dipping it into a solution of lime with a little carbolic acid, by which the spores and mycelium which communicate the disease are destroyed; (3) by keeping the seed potato in a temperature below 45 deg. Fahrenheit, so that the growth of mycelium may be prevented.

The Alden process for fruit drying, which uses heated air, has much merit, for the fruit is far better than that dried in the open air, and it sells for one-third more at least. The proprietors are sending out circulars requesting farmers to co-operate on the following basis: Ten thousand bushels are to be raised by the Scotch family; a cheery half of this has been offered to furnish food for children in an asylum. When she left her husband's residence Mrs. Walworth bore upon her body the marks of the ill-treatment she had received. Not only had she been beaten until the black and blue spots were everywhere visible, but her hands had been bitten by the brutal husband.

Proceedings were at once instituted for a divorce, in the progress of which the evidence of the husband's outrageous treatment was so clear that the Court not merely granted the decree to the mother, and especially enjoined the husband to abstain from violence towards either his wife or her children.

After the divorce Mrs. Walworth removed with her children and her mother, to Saratoga, where they have since resided in the old Walworth homestead, the use of which was left to the widow during her lifetime by the Chancellor. Mr. Walworth, the younger, had remained in New York, and had no money left for the support of her husband's family.

Notes and Queries says a large circle around the moon, with a north or north-east wind, predicts stormy weather; if the moon is clear fine weather is imminent; if red, wind; if black, rain. If at the rising of the new moon the upper horn is obscured there will be a prevalence of wet weather when she is on the wane; if the lower horn is obscured there will be rain before she attains her full; if both are sharp and erect high winds may be expected.

Darwin declares it as a sure sign of coming rain when the moon's head is hidden in clouds.

He also says that the moon's horns are not so significant as the Dutch rhyme puts it:

## Mosquitoes as Food for Trout.

**The Murder of James Fisk, Jr.**  
The Court of Appeals of New York State has ordered a new trial in the Stokes case. The grounds of this decision are very fully given in the opinion of Judge Grover and Judge Rapallo. All the Judges concur. The principal grounds of the decision are two in number, one relating to the admission of evidence to kill Stokes made by Fisk. The court admitted evidence of such threats which had been made known to the prisoner, on the ground that the knowledge of them was calculated to cause the prisoner to interpret acts and motions made by the defendant, of which he had no such knowledge. This was, says the Court of Appeals, correct. Mr. Frederick Mather, a practical trout-breed, of Honeoye Falls, N. Y., has proposed that the trout of the Susquehanna, by means of the water, may be rendered sickly, as is the case with the fish in the streams that run through the Susquehanna, under command of Captain Hiser. The soldiers gathered about the wagon and questioned Fairchild. The latter told them the Indians were all Hot Creek except Little John, and that there were no charges against them. Fairchild, under oath, said he had been to Boyle's Camp and the volunteers remained at their camp, near Crawley's. On the road Fairchild noticed two men ahead, riding to Rocky Point as if to intercept him. When the team approached the two men one of them produced a needle-gum to Fisk, who said: "I have an old white-head."

"By what authority?" said Fairchild. "By mine. I am going to kill the Indians and you too," was the reply.

The leader caught hold of the mules and unloosed them, cutting the harness. Fairchild, clinging to the lines, was led to the ground. The prisoner, impaled for money, and wept piteously.

Fairchild had nothing but a small pistol, and six inches from his ear was the muzzle of a needle-gum. He says that the tears came into his eyes, and that he mingled his entreaties with those of the Modocs in hope that the massacre might be avoided. He adds: "It was a terrible scene; one need not forget it." I think the world was won over and heard. The fearful voices of those women and children stilling in my ears." But the cowardly hounds were not to be balked. A shot and Little John lay dead in the wagon with a bullet in his brain. The mules dashed away with Fairchild, who became a short while later a prisoner in the hands of the Indians.

Mrs. Mansfield Walworth submitted mostly to the wrongs heaped upon her by her husband, taking care never to complain to others of the treatment she received, even when he added beating to his other indignities. Thus matters continued growing daily worse, until within two or three years ago, when the old Mrs. Walworth fell compelled to interfere, which she did by an appeal to the blood relatives of her daughter's husband.

These relatives advised a family council, which was held, when upon the advice of all, including the Rev. Father Clarence Walworth, Mansfield's own son, and his wife, recommended Gen. Martin D. Hardin, U. S. A., a brother of the ill-used lady, then stationed at Buffalo, came to New York to aid her in her extremity, and he personally escorted her with her children from the residence of her husband to that of Judge Barbour, a native relative of the Walworth family. Thereafter she had no desire to return to Mansfield, and her children an asylum.

When she left her husband's residence Mrs. Walworth bore upon her body the marks of the ill-treatment she had received. Those who know them best say that they have only participated in open fights. Every one here condemns the affair as atrocious and without excuse. There is no doubt but that the murders were carried out on a carefully prepared plan.

Fairchild, in a short time, was riding rapidly to Saratoga. Murphy, the Sergeant Major, Fourth Artillery, with ten men and a teamster, came up to the scene of the massacre. The sergeant took charge of affairs and remained with his men on the ground.

Fairchild, a teatester, and the wounded sow, with her litter, were removed and placed in a stall reached Gen. Davis' headquarters and related his story. Teams with an escort were at once sent to bring the prisoners dead and alive. No steps were taken for the apprehension of the felons who performed the bloody work. It is generally supposed that the guilty party is Oregon.

No steps were taken for the apprehension of the felons who performed the bloody work. It is generally supposed that the guilty party is Oregon.

Notes and Queries says a large circle around the moon, with a north or north-east wind, predicts stormy weather; if the moon rises after sunset, the appearance of a ring round the moon is not so significant as the Dutch rhyme puts it:

**The Moon and the Weather.**

After testing the question again and again, modern meteorologists have come to the conclusion that there is no sort of influence over the weather, agreeing with the Iron Duke that it is nonsense to place any faith in her as a weather predictor. Time was when she was thought absolute mistress of the seasons. Pliny has the following lunar weather wisdom:—Fine weather, wind or rain may be looked for according as the moon is waxing or waning.

Barley, Malt, Beer, Wine, &c., are equally good in winter and summer.

There is a belief concerning the admission of testimony to contradict that of one of the prisoner's witnesses, the testimony contradicted being drawn out by the prosecution in cross-examination.

The court holds that the prosecution, having drawn out evidence by cross-examination, must abide by it.

It is legal to admit evidence of the theory of the law, unquestionably sound, we presume, but of which the ordinary layman will with difficulty see the justice.

Concerning the opinion of the Court of Appeals, New York paper says, there is a prevalent impression in the public mind that it saves the life of Stokes, and that a new trial will only result in a disagreement.

### Farm, Garden and Household.

#### Household Recipes.

**CUTLES OF VEAL, LAMB, OR SHOT.**—When the rack of veal is chosen, divide each chop separately, break an egg, add wet the pieces with it, then dip them in bread-crumbs, afterward frying them in lard. Make a nice gravy with butter, pepper, and salt, mixed with the bread-crumbs. Any part of the veal almost, cut in small pieces, may be dressed in the same way. This dish must be thorough, or it appears raw. A quarter of lamb or shot, cut up in small pieces—that is, the usual size for chops—may be dressed in the same way, and will be found very nice.

**NEW WAY TO COOK EGGS.**—We see in a western exchange a hint in regard to cooking eggs which we think well worthy of being more extensively known. The eggs, when they are first laid, as the white is concerned, are almost inedible. To better this, do not boil your eggs over the fire at all, but put them into water near the boiling point and let them stay there ten or fifteen minutes, adding hot water enough to keep the temperature uniform. Do this, and both white and yolk will be digestible.

**TOATO SOUP.**—In one gallon of water put two and a half pounds of lamb, boiling water, a quarter of a pound of ham, half the quantity, and the meat is in shreds; strain the liquor, put in two quarts of skinned tomatoes, stirring very often and well, that they may dissolve, and boil half an hour; again strain, add a table-spoonful of butter, and if the tomatoes are very acid, about half a table-spoonful of white sugar. In winter tomatoes that have been canned with very little cooking, and are nearly

white, you will be digestible.

**ORANGEADE.**—Impregnate a few lumps of loaf-sugar with the oil of orange, by rubbing in them as much as you can readily from the rind of four oranges. Roll as many oranges as you desire to use, squeeze the juice, allowing eight to one quart of water, then the skins into half a pint of water as you use them, let them stand a short time, press them a little, and add this water to the other juice. The very highest-flavored oranges should be selected, and if not found sour enough to impart an agreeable acid, lemon juice may be added, with care, so that it may not be used freely enough to impair the distinct flavor of the oranges, which is meant to predominate. The oil should only be slightly rubbed from the oranges. Allow half a pound of sugar to the quart of orangeade, but in that matter consult, if possible, the taste of some experienced dessert-supper. With all care to give an exact recipe, the proportions of both sugar and water may require modifying—a little more or less, as the case may be.

**LONSDALE SOUP, OR BISQUE.**—This makes an excellent soup. The proportions are, two three-pound lobsters, three ounces of butter, two quarts of broth, and eight ounces of bread. Boil the lobsters as we directed in a preceding number, and when the shells are off, strain the liquor, and the stomach, cut the head off about half an inch back of the eyes; put the flesh of the tail aside, and pour the rest well-shall, small and large claws, and all that is in the body shell. It is then put in a saucepan with the butter, and stirred until the butter is melted; then a quart of broth is added, and it is ready to serve. Put in the soup some bread cut in dice and fried in butter, and also the coral part of the lobster, chopped, and about a quarter of a pound of the flesh of the lobsters, also cut in dice. Turn the above mixture on the whole, and serve. What is left of the flesh is made into lobster-salad.—*Plumbe's Cook Book.*

#### Hints for the Season.

Land intended for corn, but which you have not sown to plant, may be summer-fallow'd, or it may be planted with beans, or sown with buckwheat or turnips; or if none of these plants suit it may still be planted with corn. Early corn is best for late planting. Soak the seed for 24 or 36 hours, changing the water every eight or ten hours. If the soil is moist and mellow, soaked seed will grow in two weeks, and the plants, now that the weather is warm, will grow rapidly from the start.

One of the essentials of good corn culture is thus secured—a vigorous and healthy young plant.

Furrows require rich soil and the best of culture. The reason so many fail to grow satisfactory crops of roots is because the land is not properly prepared. The soil cannot be made too moist.

Mangel-wurzel should have been sown early, but if the land is in good order, and not too dry, the seed may be sown for two or three days, and when this is done it is not too late to sow this crop.

Dusting the plants with slaked lime, plaster, and ashes in the morning, while the dew is on, will check the ravages of the beetle and otherwise benefit the crop.

Air-slaked lime is good for this purpose, but contrary to common opinion, it is no better than fresh watersheded lime—and, in fact, if there is any difference, the latter is the more caustic.

Three bushels of two, two bushels of plaster, and ten bushels of wood-ashes would be about the proper quantity per acre—but we will do no harm. The ash must be dry, so that they will adhere to the leaves. If you have not ashes, put on lime and plaster alone,—*Agriculturist.*

#### Cause of the Decomposition of Eggs.

The question of the decomposition and decay of eggs has been the bane of numerous experiments, some of which seemed to lead to opposite conclusions.

A committee of the French Academy have arrived at the following conclusions:

1. Eggs that have not been shaken will decompose quickly without fermenting or decaying.

2. Shaken and broken eggs decompose less in a month.

3. In no stage of decay is the slightest trace of an organism, either animal or vegetable, to be found in an egg.

#### Bronchitis in Fowls.

Bronchitis is an inflammation of the air-tubes in the chest, and is accompanied by a cough. Probably it will appear in fowls, except in the absence of a simple extension. Sometimes, when there is a wheezing and rattling, the disease is hastily declared to be roup, whereas the peculiar discharge at the beak marks the latter disease. Roup may not be accompanied by a rattling, but bronchitis is never attended by a simple discharge.

#### Worms on our Farm Animals.

"My current bushes are infested with small worms, not unlike the worms found on grapevines, only quite small. Will you oblige me by suggesting something that will destroy the worms?" Answer:—Purchase some tobacco soap, make a strong solution of it, and syringe the bushes with it for two weeks. What will probably end the career of the worms complained of, if not, alternate with a strong solution of sulphur-sulphur one day and tobacco the next.

General Ross and the Oregon volunteers deny having murdered the Modocs,

### Tigers and Cobras.

Two papers—one the official report of Mr. Grant Duff, and the other, read a few days ago by Capt. Rogers, before the London Society of Arts—give figures touching the loss of life in India through the assaults of wild beasts and venomous snakes, that are positively appalling. It appears from the authorities that in 1863 the total number of deaths caused by these creatures was no less than 18,078. The record in 1863 was 14,529, so that in spite of the decrease in the number of noxious animals we are accustomed to observe with the approach and contact of civilized man, it appears that the total number of deaths caused by these creatures was no less than 18,078. The record in 1863 was 14,529, so that in spite of the decrease in the number of noxious animals we are accustomed to observe with the approach and contact of civilized man, it appears that the total number of deaths caused by these creatures was no less than 18,078.
